EXAMINER'S AMENDMENT

The specification is amended such that the same reference numeral "29" is not used for different structure. Reference numeral "29" is used to identify both the upper casing and the shoulder end (see page 8). Reference numeral "29" directed to the upper casing has been changed in the specification to ---31---. Applicant needs to correct the drawings (figure 6) accordingly. See the below amendments.

Also, the claims are amended such that consistent terminology is used in the independent claims. In particular, "transverse section" has been changed to ---transverse means---. See the below amendments.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Specification

In the specification, on page 8, line 8, change "29" to ---31---.

In the Claims

In claim 40, line 11, change "section" to ---means---.

In claim 41, line 12, change the first occurrence of "section" to ---means---.

In claim 58, line 13, change "section" to ---means---.

In claim 59, line 12, change the first occurrence of "section" to ---means---.

In the Drawings

The following changes to the drawings have been approved by the examiner: In figure 6, change the lower reference numeral "29" to ---31---. Such change is needed since there are two reference numerals "29" in figure 6 which are directed to different structure. The lower numeral "29" is directed to the upper casing, which has been given the numeral ---31--- in the specification (see above). In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.
